

GeerrBear Token Whitepaper

“The Legend of Geerr the Bear: Collect. Trade. Hold. Meme On.”

Introduction

GeerrBear is a meme-inspired cryptocurrency token born from the mythical world of **Cryptopia**, where the legendary Geerr the Bear rises to challenge the shadowy powers suppressing the crypto world. With deep roots in humor, community spirit, and a bit of lore-fueled rebellion, GeerrBear isn't a utility coin — it's a **collectible movement**.

There are no empty promises here — just memes, milestones, and mayhem.

Lore of Cryptopia

In a time of digital darkness, the land of **Cryptopia** was ruled by an oppressive force known as **The Suits of Endless Control**, hiding in the cursed **Shadow Mountains Cove**. From the lush capital of **Prosper Valley**, a hero emerged — a bear with the courage to defy them all.

Geerr the Bear became a symbol of resistance and laughter. With his mighty trumpet and unshakeable loyalty to the people, he unites meme lovers, traders, and degens across the lands.

Tokenomics

Total Supply: 3.5 Billion \$GEERR

Category	Allocation	Description
 Circulating Supply	1,000,000,000	Released to the public for trading and collecting
 Burn Reserve	1,000,000,000	Used for price-based burn milestones (see below)

 Developer Vault (Dead Wallet)	50,000,000	Locked away permanently to show long-term commitment
 Other	1,450,000,000	Reserved for future burns, events, memes, special use cases, release

Price-Based Burn Strategy

To reward growth and community support, **GeerrBear burns tokens** at each price milestone hit:

Price Milestone	Tokens Burned
\$0.05	50,000,000
\$0.10	50,000,000
\$0.20	50,000,000
...	...
\$1.00	Final 50,000,000

Each milestone burn comes with an epic meme post and lore update from Geerr's journey.

Security Feature: The Guardian Watchdog

Geerr's loyal companion, the **Guardian Watchdog**, serves as the project's security layer. As new scam tools rise, this feature will:

-  Monitor suspicious wallet interactions
-  Flag known threats using public anti-scam APIs
-  Send alerts to the GeerrBear community

This system will evolve with the needs of the community, with full transparency. Based on off chain bots.

The Team (Pseudonymous Heroes)

-  **GeerrMaster** – Meme Lore & Community Commander
-  **0xSnout** – Smart Contract Dev & Watchdog Architect
-  **BearFluencer** – Social Media, Memes & Community Engagement

The team is community-focused, meme-driven, and prefers privacy over pretense.

Final Notes

GeerrBear is a meme token, not a utility, security, or investment vehicle. It exists to entertain, unite, and spark creativity across the crypto space. Hold it, trade it, joke about it — **Geerr is watching, and he approves.**

“The bear who jokes last, jokes loudest.” – Geerr the Bear
